Environmental Sustainability Policy

RJV's Zero Harm Vision includes a commitment to environmental sustainability, ensuring our actions protect the environment and support future generations.

This policy applies to all RJV operations and reflects the nature, scale, and environmental impacts of our activities. We commit to:

- Managing and mitigating environmental impacts through proactive strategies.
- Providing resources and skills to effectively manage environmental risks.
- Collaborating with stakeholders to shape a sustainable future.
- Educating our people and contractors on sustainable practices and legal responsibilities.
- Setting measurable environmental objectives and striving to exceed them.
- Protecting flora, fauna, and waterways, and improving performance through waste reduction, reuse, and recycling.
- Promoting the use of recycled products to reduce our footprint.
- Preventing unauthorised clearing and complying with permit conditions.
- Preventing pollution and minimising environmental harm.
- Continuously improving our Environmental Management System to meet best practice.
- Complying with all relevant environmental laws and obligations.
- Developing work practices that support Zero Harm for people, the environment, and communities.
- Seeking innovations to reduce our carbon footprint.
- Communicating this policy to all employees and stakeholders, and making it publicly available.

Our Environmental Management System is regularly monitored, audited, and reviewed to ensure effectiveness and alignment with ISO 14001.
